Risk Management & Insurance in AUHSD October 7, 2019

Risk Management & Insurance

We are excited to share with you a smidgen of information on how Risk Management & Insurance can support you!

Within the Risk Management Program, we support all staff through the identification of risks associated with new and reoccurring activities on and off site. Managing risk exposures is essential for stewardship of public funds, minimizing losses against the District, and legal compliance. Risk Management staff provides best practices and options to ensure all activities protect students, staff, and the District. The next time you are considering a fundraiser, in need of transporting of students in your private vehicle, or before you accept that donation, etc. please contact us.

Workers' Compensation staff assist employees who sustain a workplace injury by ensuring the employee is triaged by a registered nurse, obtains necessary medical treatment, and returns safely to work. If you

sustain a workplace injury/illness, please see your senior administrative assistant right away.

Within the Employee Health Benefits Department, we enroll and maintain employees and their eligible dependents in the District's health plans, assist with unresolved health benefits issues, provide health benefits plan education, and conduct the annual Open Enrollment, which is scheduled for November 11 – 22.
